👤 PROFILE

I am a passionate and hardworking senior-level full-stack developer seeking to join an innovative team to develop responsive web applications, tools, and products. I am always eager to learn and work with the latest technologies and enjoy solving complex problems with intuitive software solutions.

My key skills are React, Angular, Vue, Node, JavaScript, TypeScript, Python, Django, Flask, Bootstrap, and CSS.

🏢 EMPLOYMENT HISTORY

Software Engineer at Warner Bros. Discovery, Yutan

September 2019 — February 2023

- Successfully completed multiple full-stack web and mobile projects utilizing React, Node, JavaScript, TypeScript, and databases such as Postgres and MySQL.
- Demonstrated expertise in developing scalable and performant applications, employing best practices and design patterns.
- Strong problem-solving skills with the ability to analyze and debug code to identify and resolve issues.
- Experience collaborating with cross-functional teams, including designers and product managers, to deliver high-quality software products.
- Continuously improved application performance and user experience by implementing new features and optimizing existing code.
- Proficient in version control systems like Git and project management tools like Jira, Trello, and Asana.
- Dedicated to staying up-to-date with emerging technologies and advancements in the industry to continuously improve development skills and knowledge

Software Engineer at Gorilla Logic, Yutan

November 2016 — August 2019

As a Front End Developer, I utilized cutting-edge technologies such as React, Next.js, Redux, and TypeScript to design and develop products. I also created CSS templates for website pages that were visually appealing and functional.

I followed Agile-Scrum development methodologies and actively participated in sprint planning and retrospectives. I engaged in client interactions and followed established procedures to develop, test, and implement implementation plans while providing deployment assistance.

In previous roles, I developed Angular applications utilizing Angular CLI, TypeScript, Git, and RxJS, and utilized Jasmine and Protractor for testing and JSON for storing and exchanging information between browsers and servers.

Software Engineer at Scopic Software, Yutan

April 2014 — October 2016

As a Web Developer at Scopic, I developed multiple websites using HTML, CSS, JavaScript, Ajax, and MySQL. My responsibilities included:

- Collaborating with designers and stakeholders to ensure website functionality and usability
- Building responsive and accessible user interfaces
- Implementing web forms and data validation
- Integrating third-party APIs and services
- Writing optimized SQL queries to manage relational databases
- Debugging and troubleshooting issues across different browsers and devices
- Applying industry best practices and standards, such as SEO and performance optimization

During my time at Scopic, I gained extensive experience in web development and

honed my skills in front-end technologies and database management. I also had the opportunity to work on a variety of projects, from e-commerce platforms to custom web applications, and to contribute to the development of the company's internal tools and processes. I'm proud of the work I did at Scopic and the impact it had on the company's success. I'm also excited to bring my skills and expertise to new challenges and opportunities in the field of web development.

EDUCATION

Bachelor of Engineering, University of Nebraska-Lincoln

May 2014 — August 2018
